

Recycling service
for businesses

Innovation for a
brighter future

A CLOSED-LOOP SYSTEM

The Energy Pod makes it possible for people to recycle small plastic packaging (normal recycling programs cannot recycle these small plastics).

Our system complies with regulations and HIPAA best practices, with processes and barriers to prevent access to recycled items. Sensors tell Resinate when it's getting full, ensuring a hands-off process for the location.

HOW IT WORKS

ALL PLASTIC
TYPES ACCEPTED! NO NEED TO
REMOVE LABELS!

Built-in signage, software and hardware guide people to recycle and earn rewards while also reducing contamination and maximizing efficiency.

REWARDS & IMPACT REPORTING

With qualifying plans, we facilitate rewards which recyclers can later redeem at the location, such as a store credit raffle or a coupon from our exclusive vendor sponsor, High Grade. Rewards are provided in an email with information about the location's positive impact.

More reasons to recycle... and return again!

Co-branded emails and social media updates tell participants and the public about incentives and the impact of recycling at the location. Locations sponsored by High Grade allow us to also regularly distribute additional digital and physical marketing materials.

Contact us for details.
